1E SERIES FEATURES

1E Mortise Cylinder

Standard mortise applications require use of BEST's 1E Series cylinders with standard 1E-C4 cam. BEST cylinders may

be altered to function with other manufacturers' locks by use of different cams (see page 8) and different cylinder rings (see page 9). Special cylinder variations are available for most applications (see pages 4 & 5). BEST cylinders are machined from brass or bronze bar stock and are available in a variety of finishes. Additional security is provided by a set screw that mounts diagonally in the cylinder wall and when tightened, holds the cylinder securely in the housing. BEST mortise cylinders feature the BEST interchangeable core and may be masterkeyed into any existing BEST system. Contact your local Best Access Systems sales office for information on special cylinder applications not listed in this catalog.

1E Rim Cylinder

Standard rim cylinder applications require the use of BEST's 1E rim cylinder series. BEST rim cylinders are interchangeable with other manufacturers' rim cylinders. BEST rim cylinders are machined from solid bar stock and are available in a variety of finishes. The standard package for the BEST rim cylinder includes cylinder, RP3 ring package, 1E-S2 spindle, clamp plate and clamp plate screws. BEST rim cylinders feature the BEST interchangeable core and may be masterkeyed into any existing Best system.

STANDARD RINGS

RP Standard Ring Package

The RP standard ring package includes a 1E-R3 ($\frac{3}{16}$ ") and 1E-R5 ($\frac{3}{8}$ ") ring.

RP1 Ring Package

The RP1 ring package for the 1E-76 cylinder includes a 1E-R2 ($\frac{1}{8}$ ") and 1E-R3 ($\frac{3}{16}$ ") ring.

RP2 Ring Package

The RP2 ring package for the 1E-64 cylinder includes a 1E-R2 ($\frac{1}{8}$ ") and 1E-R4 ($\frac{1}{4}$ ") ring.

RP3 Ring Package

The RP3 ring package for the 1E-62, 1E-72 and 1E-74 cylinders includes a 1E-R2 ($\frac{1}{8}$ ") and a 1E-R5 ($\frac{3}{8}$ ")

Standard 1E-C4 Cam

STANDARD CAM

Standard Cam for 1E-64, and 1E-74 Mortise Cylinders

Unless otherwise specified, the 1E-C4 cam is supplied on all 1E mortise cylinders.

Commonly used cams are listed on page 8.

If a cam other than the variety listed is needed, a sample cam should be forwarded to your local BEST office along with the lock manufacturer's name and lock series or identification number.

SPINDLES

1E-S2 Spindle (Steel) - A-40100-SH

1E-S3 Spindle (Bronze) - A-40100-Z

5" Spindle - A-54950; **$\frac{5}{8}$ " Spindle** - A-40101

The 1E-S2 flat spindle is supplied standard on all 1E rim cylinders. If marine application is necessary, request "marine construction" (1E-S3 bronze spindle and non ferrous materials supplied). A five (5) inch spindle is available for thick door applications.

MORTISE SERVICE EQUIPMENT

ED211

ED211 Mortise Cylinder Wrench

The Best mortise cylinder wrench and test handle is an essential dual-purpose tool. The double end is used primarily to install or remove BEST mortise cylinders without marring the cylinder surface finish. The single end may be used to test the lock operation, as well as align the throw pins.

To order specify: **ED211 mortise cylinder wrench.**

ED212

ED212 Mortise Cylinder Cam Assembly Tool

Mortise cylinder cams are quickly changed with the use of this tool. Approximate length 1 $\frac{3}{4}$."

To order specify: **ED212 assembly tool.**

ED221 Mortise Cylinder Thread Repair Die

Tool for re-threading 1 $\frac{1}{2}$ " diameter cylinders.

To order specify: **ED221 thread repair die.**

ED222 Cylinder Cam Testing Tool

Special cylinder / wrench assembly. Screws provide rapid means to install cams for testing.

To order specify: **ED222 cam testing tool.**

ED225 Hole Tap For 1 $\frac{5}{8}$ " Mortise Cylinder

Tap tool used to re-thread housing threads for 1E Mortise Cylinders.

1E HIGH SECURITY CYLINDERS

1E7J4 High Security Cylinder

1E7K4 High Security Cylinder

1E7J4 – 1E7K4 Cylinder Features

Designed for high security applications, BEST offers the 1E7J4 high security cylinder and special 5C interchangeable core. This special cylinder is listed by Underwriters Laboratories as meeting UL437 standard for key locks. The patented cylinder provides additional strength through a hardened stainless steel alloy ring, face and keyway disc. It can be masterkeyed into any BEST masterkey system. Cylinder also conforms to ANSI A156.5 mortise cylinder, Grade 1A. The 1E7J4 cylinder must be combined at the factory. The 1E7K4 cylinder is available where UL listing is not a requirement, and can be ordered uncombined.

Note 1: The 1E7J4 cylinder meets UL437 standards only when used with a 36H/37H mortise case.

Note 2: Both 1E7J4 and 1E7K4 require long blade key for operation.

1E7J4 – 1E7K4 Cylinder Specifications

Diameter: 1 5/8". 1.150-32 (NS-2A) threaded mortise cylinder.

Mounting length: 7 pin – 1 1/16".

Material: Brass (cylinder) and stainless steel ring.

Finish: 630 (nickel plated satin stainless steel material).

Cylinder rings: High security wrench resistant, machined from stainless steel, hardened, and nickel plated. Special door preparation required. Diameter of hole 1 3/4".

Cylinder face, Keyway disc.: Stainless steel, hardened

Cam: Supplied with C258 cam. See page 8 for special cams.

To order: Designate "J4" or "K4" on Step "C" order procedure. (see page 2.)

PATENTED KEYING

BEST Peaks®
Patented Keying

BEST Peaks® – For advanced solutions in key control and security, BEST offers Peaks®, the most adaptable and cost effective patented keying system on the market. The patented mechanism ensures that cylinders and cores will only operate with the Peaks® keys, which are only available through authorized BEST distributors.

For BEST products, Peaks® offers the security and convenience of a patented solution for interchangeable core. Peaks® is also available to adapt to a wide variety of locks from other manufacturers. All cylinders can be keyed into the same system, providing you the ability to operate all the locks at your facility using a single key, regardless of the lock manufacturer.

SPECIAL EUROPROFILES

Mortise locksets from a number of different international manufacturers can be incorporated into your BEST masterkeyed system by replacing the cylinder with a Best Eurocylinder and 3C European interchangeable core. When ordering, please specify the lock manufacturer's name and their model number. Some Euro profile cylinders will accept Best standard core rather than the 3C core. Please specify the "E" option when ordering standard cores for use in Eurocylinders.

The most popular of the European adaptations is for the Europe an cylinder. Best Access Systems order nomenclature and several required critical dimensions are listed below. Please specify, as requested when ordering.

Critical Dimensions - Europrofile

- "A"— Dimension to center of lockset case. Determined by measuring from set screw location to outside of door face.
- "B"— Door thickness.
- "C"— Dimension from center of key rotation to center of handle rotation, if other than 72mm. Maximum allowed— 114mm. Minimum allowed— 37mm

CYLINDERS AND CAMS

Special cams are available which will operate most mortise locksets, regardless of make or function. With these cams, your masterkey system can be extended through the use of replacement cylinders with cams similar to those being used. A few of the cams are illustrated. Other designs are available upon request. All cams available are designed for use on BEST mortise cylinders.

WARNING— Best Access Systems desires to provide up-to-date and reliable product adaptation uses. However, BEST cannot guarantee the quality of other manufacturers' locksets. In addition, other lock manufacturers' may make changes to their product that affect the operation and compatibility of our core and cylinder adaptation. When this occurs, those manufacturers' have no obligation to notify BEST. If you are using a BEST cylinder in another manufacturers' lockset and find that it does not operate properly for any reason, please contact your local BEST sales office immediately.

UTILITY CYLINDER LOCK

5E-3/4" Cylinder

Specifications

The 5E utility cylinder lock fits standard 3/4" diameter cylinder installations such as wood or metal desks, file cabinets, vending machines, utility and storage cabinets, elevators and security alarm control panels. The complete 5E assembly includes a combined 3/4" cylinder with cam, hex nut, lock washer and spacer collar.

Maximum mounting surface thickness— 5E utility cylinder locks may be mounted on surfaces with the following maximum thickness: 5E6—11/16", 5E7—27/32"

Keying— May be keyed individually, keyed alike or masterkeyed into a new or existing Best standard masterkeyed security system.

Service— 5E cylinders may be recombinated and serviced onsite. Special service equipment is available (see Service Equipment Section of Best catalog).

Finish— 626 satin chrome only

Refer To The Following Procedure When Ordering
See Order Example At Bottom Of Next Page.

A Cam Motion and Degree of Rotation
When ordering 5E cylinders, specify the cam motion type and degree of rotation. Available cam motion types are listed below. Different type motions are limited to different degrees of key rotations.

Type A— Direct motion - Key and cam rotation is direct. Key may be removed in locked position only. Motion is 360 degrees right or left.

Type B— Limited motion - Key and cam rotation is direct. Key may be removed in locked position only. Motion is limited to 90 degrees or 180 degrees right or left.

Type C— Lost motion. Cam rotates 90 degrees right or left. Key rotates 360 degrees. Key removal with cam in locked or unlocked position.

Type D— Throw member drive - Key and drive motion is direct. Key may be removed in locked position only. Motion is 360 degrees right or left.

B Determine Ring Length

A spacer collar may be required to position the cam for proper lock operation. The spacer collar is installed between the 5E cylinder head and the mounting surface. To determine the proper length of the spacer collar, add together: the desired distance from the cam to the inside of the mounting surface ("A" above) to the measured thickness of the mounting surface ("B" above). Then, subtract this total from: 31/32" when installing a 5E6, or 1 1/8" when installing a 5E7. The remainder is the collar length, which is illustrated.

To properly order spacer collars, designate the following nomenclature for the length desired:

5E Spacer Collar Length Chart

Length	Nomenclature	To order separately
1/16"	R701	5E-R701
1/8"	R702	5E-R702
3/16"	R703	5E-R703
1/4"	R704	5E-R704
5/16"	R705	5E-R705
3/8"	R706	5E-R706
7/16"	R707	5E-R707
1/2"	R708	5E-R708

C Select Proper Cam Type

Cam

Cams for 5E cylinders are available with a number of variations to suit the particular application as required. Two major variations that must be designated on the order are:

A.) The cam type, and B.) The cam length.

Cam Types

The following cam types are available for the Best 5E cylinder. Other designs are available upon request. (See page 8)

2A&2B
Offset Cam
Fixed Motion

Cam Types Defined (Listed relative to motion/rotation)

C1— Straight cam mounted for fixed motion operation (used in conjunction with type "A" and type "B" motions). To order cam separately, designate 5E-C1 and length from code chart at option D.

C3— Straight cam mounted for lost motion operation (used in conjunction with type "C" cam motions). To order cam separately, designate 5E-C3 and length from code chart at option D.

2A— Offset cam (inward mount) for lost motion operation (used in conjunction with type "A" and type "B" motions). To order cam separately, designate 5E-C2A and length from code chart at option D.

2B— Offset cam (outward mount) for fixed motion operation (used in conjunction with type "A" and type "B" motions). To order cam separately, designate 5E-C2B and length from code chart at option D.

4A— Offset cam (inward mount) for fixed motion operation (used in conjunction with type "C" cam motions). To order cam separately, designate 5E-C4A and length from code chart at option D.

4B— Offset cam (outward mount) for lost motion operation (used in conjunction with type "C" cam motions). To order cam separately, designate 5E-C4B and length from code chart at option D.

D— Direct throw member drive and tailpiece. Throw pins engage cylinder to flat spindle tailpiece. The standard flat spindle tailpiece is 1 1/8" and may be cut to length desired. To order spindle separately, designate 5E-D.

D Determine Cam Length

Cam length is determined by measuring from center of the cam rotation to the tip of the cam.

Straight Cam

Length	Code #
5/8"	10
3/4"	12
7/8"	14
1"	16
1 1/4"	20
1 1/2"	24
2"	32
2 1/2"	40
3"	48
3 1/2"	56

Offset Cam

Length	Code #
1 1/16"	17
1 5/16"	21
1 9/16"	29
2 1/16"	37
2 5/16"	45

E Cam Mounting Position and Cam Direction

Direct Throw Member Drive and Tailpiece

Cams may be mounted in one of four "clock" positions as pictured below. Designate cam mounting and rotation direction (right-"R" left-"L"). Key is only removable in the locked position, unless ordering type C. (Available in locked and unlocked positions.)

3 o'clock = 3
6 o'clock = 6
9 o'clock = 9
12 o'clock = 12
